News Brief

[www.data-collection.com](http://www.data-collection.com)

**DID YOU KNOW...**

**The 7526 was designed by IBM to survive in  
*HARSH* factory floor environments?**

**Check out these specifications:**

**Operating Temperature: -201 to +501 C**

**-41 to +1221 F**

**Relative Humidity: 5% to 95% non-condensing**

**We also have an Environmental Sealing Gasket Kit  
for mounting the 7526 to an enclosure for moisture  
protection.**

**Plus there are a whole series of SHOCK &  
VIBRATION “specs” too numerous for a news  
“Brief”.**

**If you’ve got a tough environment, call us. The  
7526 is a SURVIVOR in *HARSH* environments.**
