## News Brief

[www.data-collection.com](http://www.data-collection.com)

### **HANDS FREE BARCODE SCANNING?**

We recently received some SP-400 Scanners with stands that hold the scanner so that an item can simply be passed under the scanner (mounted on top of the stand facing downward) and the barcode is scanned without having to squeeze the trigger on the scanner "gun". Although these are in used condition, they have all been checked out and function correctly. We are offering them at **\$195.00** each as long as they last.

### **Eliminating some confusion - our addresses, etc.**

Some clients are still sending FAXes & shipping units to our old address and phone number. As we've grown, we've had to make changes to support the new volumes. Here is the correct info:

1. Our new FAX number is 561-981-8596
2. Our "Ship to" address for repairs is: 5701 N. Dixie Hwy., Boca Raton, FL 33487
3. Our "Bill to" address for correspondence, Purchase Orders, etc. is:  
328 Knob Hill Blvd, Boca Raton, FL 33431

### **Software - software - software...**

**Nope - we don't do software!** We are not systems integrators nor application specialists. HOWEVER, we do have business partners that can help you in these areas. Call us if you need a referral. On the other hand, you should know that DC Connect, the "enabling software" for IBM 7525/7526/7527 Data Collection Terminals (DCTs), is the latest DCT software from IBM. Contact Dean Smetana at [dsmetana@us.ibm.com](mailto:dsmetana@us.ibm.com) for pricing or technical support. If you have questions about installation or configuration, call us. Mike Yankowski used to teach classes on DC Connect when he worked for IBM here in Boca.

**Remember: We offer Repair Service and Maintenance Agreements for all three families of IBM DCTs - the ELF(7494/7525), 7526 and 7527.**

*Thanks for your business!*

Ron, Jack, Tottie, Frank & Mike

Is there someone else in your company that you think we should add to our mailing list? Send us their e-mail address and we'll happily oblige.
